

## TMG 722

TMG 722 can be used for catalysis of polyurethane systems. The bismuth based products shows similar catalytical behavior as DBTL in certain polyurethane applications.

TMG 722 is a catalyst dissolved in a special solvent, which distributes well in the reactant and is especially suitable for polyurethane systems.

TMG 722 can be added to the reactants either as it is or blended with alcohols.

<b>Product characteristics</b>	
Formula	Proprietary formulation
Appearance	Yellowish liquid
Bi content	21-23%

### Storage

TMG 722 can be stored for at least one year if kept closed in the original packaging.

### Packaging

25kg drums

### Special advice for security

Information concerning:

- classification and labelling according to the regulations governing transport and hazardous chemicals
  - protective measures for storage and handling
  - safety measures in case of accident and fire
  - toxicity and ecological effects
- are given in our material safety data sheets.
